

7th Elmer/Ice users meeting 5 October 2020 – Zoom

Few rules for zoom

- Keep your microphone off when not speaking
- Ask questions through the chat or said you have a question by raising your virtual hand
- Having or not the camera switched on depends on your own network quality (but nice for speakers to see few faces listening to them!)

Program

9h00-9h10: Few words of introduction - Olivier

9h10-9h30 : Seasonal ice flow of Ross Ice Shelf: reconciling model and observations - Cyrille Mosbeux

9h30-9h40: FISOC - Rupert Gladstone

9h40-9h50: Coupling Elmer/Ice and OpenFoam – Alex Jarosch

9h50-10h10: Inversion with Stokes of Antarctica - Rupert Gladstone

10h10-10h30: Elmer release 8.5 - Thomas Zwinger/Peter Raback

10h30-10h40: coffee break

10h40-11h00: Ice Cave and Lagrange multipliers - Julien Brondex

11h00-11h20: Regional paleo ice sheet simulations with Elmer/Ice - Clemens Schannwell

11h30: Discussion - Any information you would like to share (project starting, implementation suggestions, last push,...)? - Olivier/Thomas/Fabien

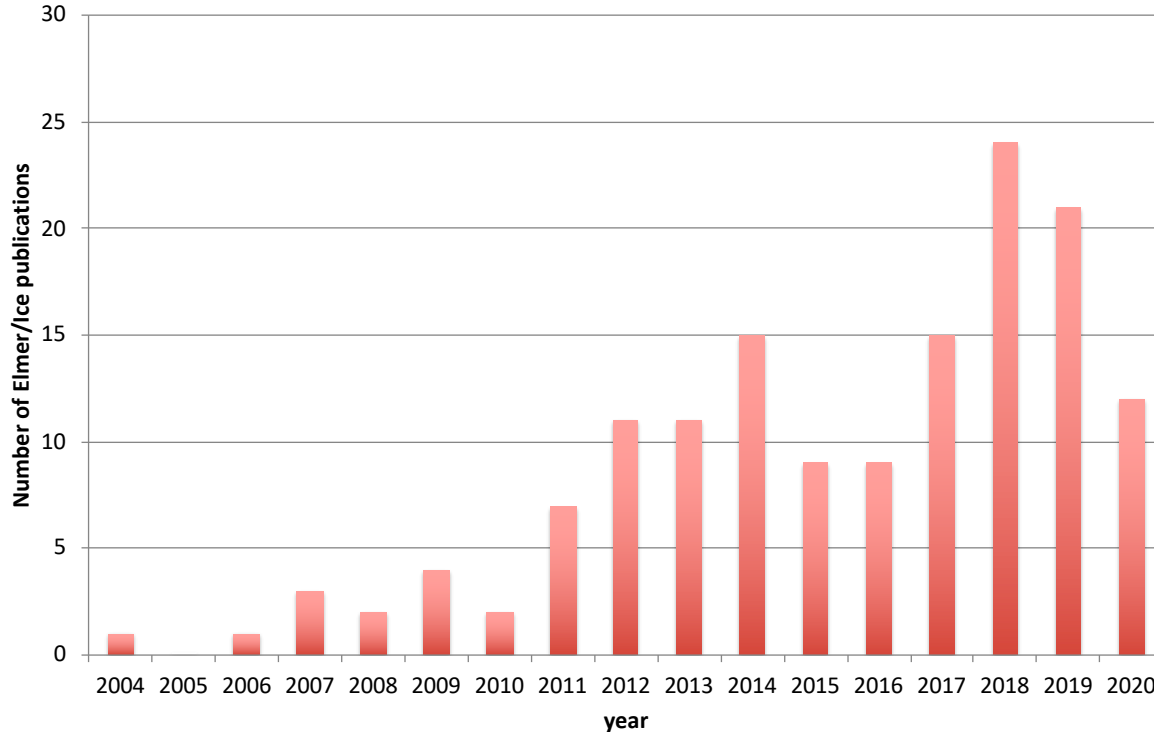

Elmer/Ice courses

Next Elmer/Ice beginner course:

- Remote course 23-27 November 2020
- 2h max session per day (repeated morning and afternoon) + tutorial videos
- ~60 participants registered (UTC +/- 8)

Elmer/Ice applications

148 publications using Elmer/Ice since 2004

Let us know when you have a new publication accepted!

Program

send me a pdf of your presentation to
put on the wiki!
